

COVID-19 Classroom Safety Challenge

This Product is designed to provide a safe and healthy environment to the students in classrooms.

It can be attached to any table of any size and can provide a safe working space in classrooms and offices.

this device has a **transparent sheet inside** it , which can be **pulled out** using a handle and can be attached to the other side of the the table.

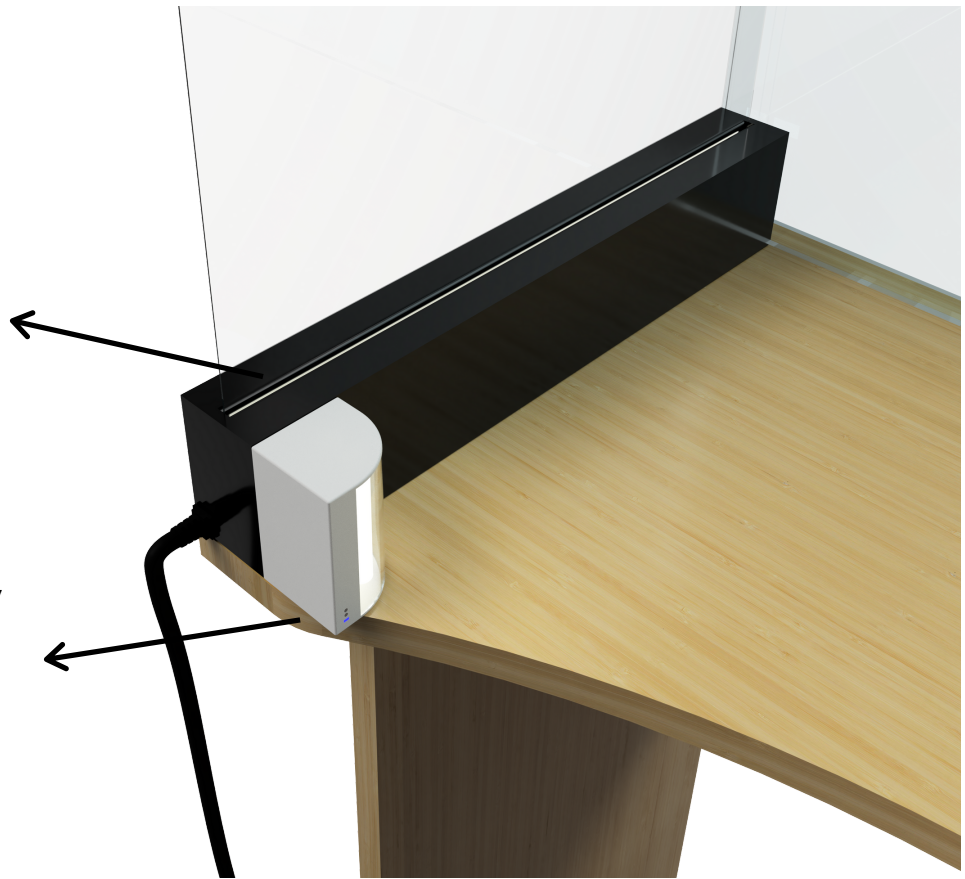

The device is equipped with **an UV light near the sheet roll**, which will start sterlizing the sheet when the sheet goes in or out of the box.

There is also a external UV light for disinfecting the table.

As UV light is harmful for human skin, The **first UV light** is **inside the box** near the sheet roll and **activates only when the sheet starts moving**.

UV light covered inside the box(activates when sheet moves)

External UV light which works when the desk is free.

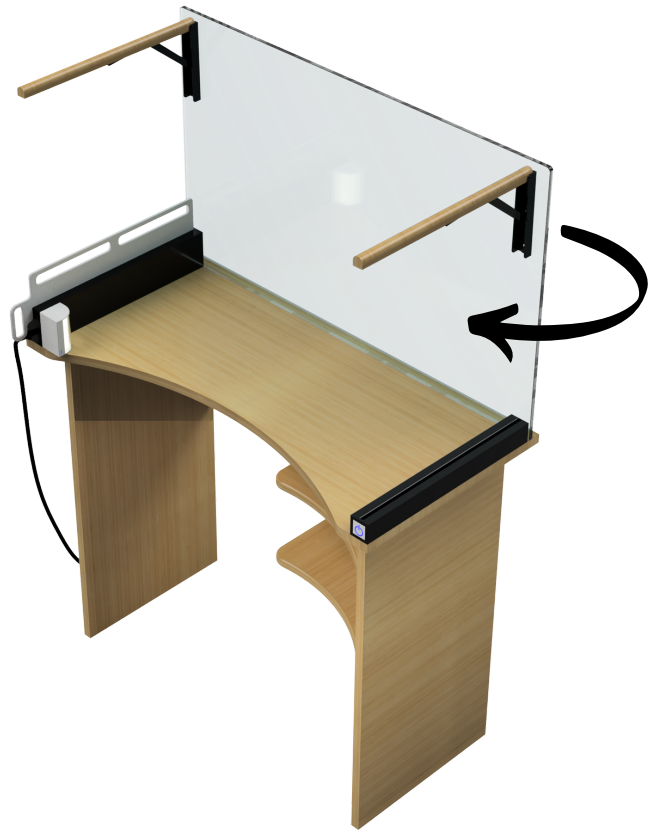

Step 1

Install the Glass and the device

Step 2

Open the sticks that are attached to the front window screen.

Step 3

Start Pulling out the sheet and wrap it over the sticks.

Step 4

Clip the handle on the other side of the table, so that it forms a box on the table.

Step 5

Wait for the secondary UV light to disinfectant the table,

Within seconds your table will be free from all infectious viruses and bacterias and covered from all sides . so that no virus can enter your Work table.
